Best app to learn guitar for beginners free

Longing to learn guitar, but unable to find an instructor? Why not become a self-taught Rockstar with these best guitar learning apps. Today in this article, we will talk about some of the top-rated Android and iOS guitar learning apps. These apps are both free and paid. So, what are you waiting for? Pull out your guitar stuck under the bed for years and learn something interesting. Best Apps To Learn Guitar using your Smartphone – Android, and iOS. All the apps listed below are best in their sense; they offer techniques, chords, and more favorite songs to play on electric, bass, and acoustic guitar. 1. Fender Play – Great guitar learning app for beginners Price: Free Offers In-App purchases Platform – Android and iOS Fender Play is a comprehensive guitar, ukulele, and bass learning app for beginners. The app offers bite-sized lessons and features your favorite songs. Using it, you can learn both acoustic and electric instruments. All the lessons focus on essentials like how to read tables and play riffs in different genres. Further, new content is added weekly; instructors provide tips and trick and step by step guided learning. Here are some of the extraordinary features of this guitar track app. Features: Step-by-step lessons High-quality video lessons Track your progress Experienced and expert instructors Learn at your own pace 2. Yousician – best app for learning bass guitar Price: Free Offers In-App purchases Platform: Android and iOS Give free rein to your inner musician with Yousician, remote guitar learning app. The app can be used by beginners, singers, Gutarists, Ukulele players, and advanced and professional musicians. Yousician offers step-by-step video tutorials and even gives assignments to track your performance and give feedback. This guitar learning app is free to download; however, to use the app across devices and enjoy unlimited, uninterrupted playtime, you will have to pay for the premium subscription. A few striking features of this guitar lesson app are listed below: Features: Step by step tutorial to suit your playing level 1500 + missions, lessons & exercises Teaches music theory It includes special trainers for each chord & Skill Makes learning fun with rewarding gameplay & challenges 3. BandLab – Best free music creation guitar learning app Price: Free Offers In-App purchases Platform: Android and iOS With over 9 million users worldwide, BandLab is an ultimate free music creation platform for guitar lovers. Using this app, you can import a track to create your songs and publish them on the BandLab community. Moreover, using the multi-track editor of this best guitar learning app, you can record, edit, and remix any tune. Some of its outstanding features are listed below: Features: High-quality tone 12-Track mix editor 100+ virtual MIDI instruments Great audio tools like tuner and metronome Record live audio or import, mix with DAW workstation 4. Real Guitar – Best electric and acoustic guitar learning app Price: Free Offers In-App purchases Platform: Android and iOS Learn to play the guitar and live your dream with this outstanding and comprehensive best guitar tutorial app. This best app to learn guitar is perfect for beginners as you can quickly turn your phone into a lifelike simulation of an electric or acoustic guitar. You can play guitar chords or can pick solo, as well as can jam in real-time. You can even try using the best jamming apps. Features: Studio-quality audio 3 types of electric and acoustic guitar learning lessons 16 loops to jam Recording can be exported to MP3 3 playing modes 5. Perfect Ear – Great guitar teaching app Price: Free Offers In-App purchases Platform: Android and iOS Get perfect, high quality, and unique ear training with this guitar teaching app. Music teachers recommend the app across the globe, and it covers the essential part of musical training, i.e. ear training. Using this free musical instrument training app, you can learn to play both guitar and piano. Features: Simple and straightforward to use Customizable interval, chord, scale, and rhythm training exercises Allows creating chords, customer scales, etc. A complete-scale dictionaries Best guitar chord app 6. GuitarTuna – best guitar lesson app Price: Free Offers In-App purchases Platform: Android and iOS Another popular guitar tuning and learning app that works on both Android and iOS. Using this ultimate musical instrument app, you can learn to play guitar, ukulele, and bass. Suitable for both beginners and experts to date, the app has been downloaded over 100 million times. The app works with acoustic, electric guitars, bass, Viola, Banjo, and others. Features: It offers a couple of unique features Fun to use acoustic, electric, and bass learning app Offers noise cancellation allowing users to use it in noisy areas 6 chord learning games to learn, practices and master chords Auto mode tuner and chromatic tuner 7. SmartChord – best app for learning guitar, mandolin, etc Price: Free Offers In-App purchases Platform: Android A smart app for every musician, from beginners to professionals, everyone can learn different tricks to play the guitar. This app integrates many interlocking tools like Songbook with Set list or Chord Progression. Using it, you can learn to play musical instruments like Guitar, Mandolin or Bouzouki. This best guitar learning app offers predefined and custom tunings from 3 – 8 strings. Features: Huge chord and tablature database Various interesting features Guitar tutorial app Compose and transpose chord progressions Different modes for beginners, intermediate and experts 8. Guitar Jam Tracks – best guitar learning app Price: $4.99 Platform: iOS #1 guitar practice app that helps jam improve rhythm and create great music. This app makes learning scales and scales patterns more fun. Beginner, intermediate, and expert all can use this best guitar learning app. For interruption-free practice, this app offers auto-looping playback. Features: Intuitive UI Online guitar lessons 5 great-sounding backing tracks Perfect jamming app Easy-to-read scale charts with zoom feature 9. Justin Guitar – best online guitar lessons app Price: Free Offers In-App purchases Platform: Android and iOS World's best guitar learning app with teacher guides. This is the perfect app for beginners as it makes you learn tricks to play the guitar. Justin Guitar guides you through step by step to teach chords, strumming, capo, etc. in no time. Its teaching method is very effective; hence it is considered one of the best guitar learning apps for beginners. Features: Easy to use Great guitar lessons for beginners Exclusive fingerpicking, strumming exercises, chord change counters, etc. Accurate and easy to use a tuner 50+ exclusive guitar teaching videos 10. Guitar 3D – best app for learning electric guitar for beginners Price: Free Offers In-App purchases Platform: Android and iOS From Guitar 3D creators, this app is designed for guitar lovers who are facing problems in finding an instructor or are short of time. Using this real guitar teaching app, you can learn basic guitar with a real-time 3D camera and get correct when finger movement between chords go wrong. Features: Easy to use Versatile guitar lesson app 3D camera to observe fingerings Left-hand option for 3D view Real guitar examples for each chord Final Thoughts People say guitar learning is tough; you cannot learn it online but trust me once you decide to do a thing nothing is difficult. All you need is determination. If you have it, you can learn anything in the world, even the guitar. By using the best guitar learning apps listed above, you can create a future for yourself and fulfill your dreams. Let people say what they want to, start using any of the guitar lesson apps, and be the best guitarist. In addition to this, you can checkout 14 Best Audio Recording Software to Record High-Quality Sound, & Best Free Music Downloading Apps for Android. All the apps listed above will help learn to play the guitar. The only thing it asks you to do is practice. Do let us which app you liked the most and why? Also, if you want us to write on anything specific, please leave a comment in the section below. Hey, fellow guitarist! AcousticGuitar.com is here to support you with fantastic articles (like this one.) If you like what we do, please give $1 (or whatever you can afford) in support of our work. Editor's note: This article originally appeared in the July/August 2019 issue of Acoustic Guitar magazine. Author Kate Koenig updated it for accuracy in 2021 (and wrote a follow-up installment which covers YouTube channels, plus even more websites and apps you may wish to try.) There are several reasons why traditional music lessons aren't for everyone. In a practical sense, you may not be able to afford them. Or maybe you just don't have the time to fit a regular lesson into your week and devote additional hours to practicing. Or perhaps, for whatever reason, taking lessons is just not how you want to learn. Being a self-taught guitarist (or musician in general) is as well-accommodated as it ever has been, mostly because of the wide variety of apps, software, and websites to choose from. "It's changed the way we think about the self-taught musician," says Dr. Bryan Powell, founding co-editor of the Journal of Popular Music Education and chair-elect of the National Association for Music Education. "Now the 'self-taught musician' has a lot of teachers. Keeping our goals in mind while we survey resources will help us find the right ones that are going to work for us." Aside from the resources that can be found on YouTube, and apart from the many apps that can make the process easier, there is a bounty of pre-structured, all-in-one courses that are customizable enough to suit beginning, intermediate, and even advanced players. They fall under two main categories: immersive software programs and online lesson databases. Of course, having so many options can be fatiguing when it comes to making the right choice. Here are some of the most popular and renowned programs to help you get started. Options for Learning Guitar Online Best for beginners, Yousician is an immersive software package that engages users in a new way. Founded in 2011 by Chris Thür and Mikko Kaipainen, the company's first program, WildChords, was designed as a video game for children. A few years later, they produced Yousician, which offers lessons on guitar, bass, ukulele, piano, and as of 2018, voice. It's available for Mac and PC, as well as in an app version for Android and Apple devices. For guitar, Yousician offers a series of lessons with three initial paths to choose from: Lead, Rhythm, and Knowledge. Each offers slightly different customized study, but the basic structure is the same for most lessons: You watch a video of an instructor explaining a technique, and then you play an exercise that allows you to practice it. The exercises are what make the program unique. A backing track plays as tab-style notation scrolls past on a fretboard—to earn points and pass the exercise, students have to play the notes accurately and on rhythm. The coolest thing about Yousician is that you don't need anything more than a guitar and a working microphone on your device or computer—the program processes the sound of your guitar and can tell if you're playing the notes correctly, even when the music gets more fast-paced and complex. Through the help of this audio signal-processing tech, you get valuable feedback on note and rhythmic accuracy. Yousician teaches through songs, and structures the course based on your skill level. You also can't progress to the next lesson until you've completed the previous one. One interesting feature is that if you're in a rush, you can enter the amount of time you have to practice, and the program will offer you a lesson that fits. The program also comes with a musical toolkit, which includes exercises for learning and practicing chords, standard notation, scales, and arpeggios, as well as collections of songs to practice fingerpicking styles, barre chords, and songs that belong to certain genres. While the program is effectively structured and a fun, engaging tool, one drawback is that the songs are limited. Other learning methods include access to almost any popular song you're interested in learning how to play; when using Yousician, you're limited to covers of popular songs and traditional, public-domain folk songs. Another commercially popular immersive software system for learning guitar is Rocksmith—a program that essentially allows you to play the popular video game Guitar Hero on a real guitar, available on PlayStation 3, Xbox 360, and Microsoft Windows. In comparison to Yousician, Rocksmith doesn't offer as much educational value or rudimentary exercises. It can, however, act as a fun practice tool for intermediate to advanced players. Six of the Best Websites for Learning Guitar Aside from immersive software package that engages users in a new way—which we'll touch on a bit later—immersive software is where you'll find the most benefits that come in the way of what modern technology has to offer. More than gimmicks, those features are useful—but in other ways, there's nothing better than the basic instructional tools that can be found in our other main category: online databases. One of the most highly recommended online databases for learning to play guitar is GuitarTricks.com. Founded in 1998, Guitar Tricks offers 11,000 standard video lessons, delivered by their staff of instructors. In addition to their database, a key benefit is that on request, you're able to book a private video lesson with an instructor, or a spot in a group session. The site, whose resources can also be accessed via its Android app, boasts a collection of 600-plus songs subdivided into categories including bluegrass, jazz, blues, metal, rock, surf, country, classical, and funk & soul. Each song comes with its own instructional video, and some come with their own scores. One aspect unique to Guitar Tricks is the Core Learning System. Designed especially for beginning students and those returning to the guitar after a long break, the system allows you to structure a series of courses based on specifically what you choose to learn on the instrument. Like most all-in-one services, you also have access to tools including a scale finder, metronome, chord finder, and tuner, along with a few other customized exercise programs. Advertisement Guitar Tricks is one of many online databases; other popular sites include: JamPlay offers 6,500 lessons from over 90 instructors, which include celebrity artists like Bumblefoot (Guns N' Roses), Steve Stevens (Billy Idol), and Mike Keneally (Steve Vai, Joe Satriani), as well as live video lessons in which site members can interact with the instructor. Though they have fewer lessons to choose from, ArtistWorks offers instruction on a variety of instruments in addition to the guitar, from seasoned teachers including Paul Gilbert, Keith Wyatt, Tony Trischka, and classical guitarist Jason Vieaux. The site's best feature is its video exchange, in which students can submit videos of themselves playing, and receive instructor feedback based on their technique. Acoustic Guitar Plus, an online subscription learning platform from Stringletter Media, the company that publishes Acoustic Guitar magazine, offers hundreds of instructional videos from master teachers at AG, Hal Leonard, Homespun, and others, and caters to acoustic and electric players of all levels and styles. With the largest database online, TrueFire has 40,000 lessons with 140 plus instructors, including Muriel Anderson, Tommy Emmanuel, Laurence Juber, and Adam Levy. An entirely free service, JustinGuitar offers over 1,000 lessons and appears on several "best online guitar resources" lists. Outside of all-inclusive software programs and lesson databases, there are several incredibly useful apps that are available to the self-taught musician. Offering a very basic yet timeless function is Roni Music's Amazing Slow Downer—which does just what it says: it slows down recorded music without affecting the pitch. It's available as software on both Macs and PCs, and now there's an ASD app for Android and Apple devices that can connect to tracks on Spotify (with a Spotify Premium account). Available on Apple, PC, and Android devices, EarMaster 7 Pro includes 2,500 exercises for ear training and sight-singing, along with fundamental music theory and rhythm study. The range of exercises is interactive and designed for all skill levels. With a database of 2,000 songs, FourChords is an app for Android and Apple devices that breaks down songs into four simple guitar chords to make them easy to follow for beginners. It also includes lesson tutorials from JustinGuitar, as well as the ability to adjust the key and tempo, track progress, and get feedback via audio signal processing tech (the same used in Yousician). Chordify is a unique app that uses audio signal processing in a different way: It analyzes an uploaded song (from anywhere online, or your own hard drive) and outputs a measure-by-measure chord chart. It then allows you to play back, edit, and transpose the results. It's available as an app for both Android and Apple devices. Get stories like this in your inbox You can find tablature and chord charts for nearly any song you're interested in learning with Ultimate Guitar Tab, Songsterr, and GuitarTapp PRO. iReal Pro, and Guitar Jam Tracks are three examples of play-along apps that provide you with the backing tracks you need to play along with the songs you're working on. There are a number of tuner apps available, but Guitar Tuna (from the makers of Yousician) is especially handy for its simplicity. What Guitar Teachers Think of Online Learning A former New York City public school teacher, the aforementioned Dr. Powell also teaches at several universities in the NYC metropolitan area. (He assigns homework to his master's level education students, to whom he's teaching basic guitar for use in their own classrooms, on FourChords.) "I think it's a really exciting time for people who want to learn guitar," he says. Especially in the realm of popular music education, Powell emphasizes the importance of applying your individual goals to your self-education. "Choosing the different resources that work for you, playing the songs that you want to play, and learning in the way you want to, is a better approach for engaging students to stay with playing the guitar throughout their lifespan. "It starts with what you want to do. The people who are going to stick with learning a new instrument, whatever it is—it's based on attraction to their interest. Because, if you're really into it, when your fingers start hurting because you're playing guitar chords and you haven't built up calluses, that passion is what's going to keep you coming back." Christopher Sampson—founding director of the popular music program and songwriting professor at USC Thornton School of Music—has had a multifaceted performing career on the guitar. He uses EarMaster Pro every morning as part of his daily routine. "It's my equivalent of going to the gym," he says. Advertisement "At the beginning level, I think these resources and these apps can be great at every entry points," he continues. "They can offer really good starting points to get somebody on fire and interested, and there's a lot to be said for that. Enthusiasm goes a long way." When choosing the right educational app or program, Sampson says, "It has to work very intuitively so that I'm not working harder at learning the software than I am at learning the skills that I need. "Ultimately, all music is self-taught," Sampson adds. "For somebody to really achieve something interesting in music, they're going to have to take all the concepts they gather, whether that's via technology, influences, peers, and they're going to have to figure out how to create their own style and sound. "They have to teach themselves what this means to them. That's a big step—but the self-initiative part of things, of students sparking their own learning process, is a great sign that they might be ready for that down the road." THANKS FOR READINGHere's an additional free resource to help you in your search for online guitar learning sites and apps, compliments of AcousticGuitar.com.
